**Today's Speaker**  
**Doug Reed**  
**"Musical Echoes"**  
~~~~~

Douglas Fishhawk Reed is a local artisan, member of the Echota Tribe of Northern Alabama, businessman and civic leader, who with his wife Marty owns Merlin's Jewelry in downtown Ft. Walton Beach.

In order to share his appreciation of this haunting instrument and of his Native American heritage, he founded [Musical Echoes](#), a Native American Flute Festival and Cultural Event. This event is held each spring, the last weekend in April, in downtown [Ft. Walton Beach](#).

While jewelry designing and creating is his true passion, making and playing the Native American flute is a very close second. Douglas is quick to point out that while making jewelry and flutes are important, he is also an avid fisherman spending too many hours, according to his wife Marty, fishing the beautiful emerald green waters of the Gulf of Mexico.

Finally, Douglas points out that all of his artistic talent is a gift from God. He says, "I never know what God has in store for me, but I'm always available and aware that I am only one of God's tools, of which there are many." Doug says, that, "being part of God's great plan is the greatest honor of all."

What are WAPIs?

The Water Pasteurization Indicator (WAPI) is a simple, low cost device containing a special soy wax that helps users determine when water has reached pasteurization temperatures. The wax melts at the same temperature as the water is pasteurized.

Disease-causing organisms in water and milk are killed by exposure to heat in a process known as pasteurization. Boiling is often recommended to achieve pasteurization. However, contaminated water and milk can be pasteurized at temperatures well below boiling, saving time and fuel. Water heated to 149 degrees F (65 degrees C) for a short period of time is free from microbes, including E Coli, Rotaviruses, Giardia and Hepatitis A virus. At 160 degrees F (71 degrees C) milk and foods are pasteurized.

The WAPI can be used successfully over most fuel sources including wood, charcoal and gas. It also works especially well in conjunction with a solar cooker. With good sun, simple solar cookers can pasteurize water for a family at a rate of about one liter of water per hour.

The Rotary Club of Fresno, California, is promoting the reusable WAPI (Water Pasteurization Indicator) and is partnering with 18 Interact and Rotaract clubs to manufacture the device. The devices cost 33 cents each and can be used repeatedly. 37,000 have been distributed over the past 5 years.

VOCATIONAL NIGHT—MARCH 7TH

From time to time we try to do a Vocational Meeting, where we can find out more about our community. Debbie Bodensine has arranged for us to have a vocational event on Monday, March 7th at the new Emergency Operations Center on the campus of NW FL State College. Time is 5:30pm. We will skip our regular Wed meeting that week. If you are sitting with a Snowbird today, please invite them to join us. We can arrange payment to defray the cost of the food. For those who do not attend Vocational Night, an absence fine will be incurred. Those with perfect attendance should pay close attention to this.

HOW TO START A FIGHT

One year, I decided to buy my mother-in-law a cemetery plot as a gift.

The next year, I didn't buy her a gift.

When she asked me why, I replied, "Well, you still haven't used the gift I bought you last year!"

And that's how the fight started.

I took my wife to a restaurant.

The waiter, for some reason, took my order first.

"I'll have the steak, rare, please."

He said, "Aren't you worried about the mad cow?"

"Nah, she can order for herself."

And that's how the fight started.
